STEFANO

GUBIOLO

Bassano del Grappa   1999

I am a visual designer and illustrator, I love to photograph (mostly analog) and I would like to explore more in the area of motion graphics. I have always been curious about how things are created, I don't talk much but most of the time it is to ask something. I love group work because it allows a continuous and mutual exchange of knowledge.

In my spare time I like to walk in the mountains and explore new place, I find it invigorates my creativity as well.
